15 August 2025.

Jump 25. Index

*How Price Seem to generate Liquidity: A Study on Jump 25 Index
Reveal that my first assertion is right.

Why? Price moves in waves A grab of accumulated orders is a clearing of / or reduction of sellside orders or Buyside orders.

*People with enough capital to move price must hedge to avoid showing their hand. If a ~~market~~ Buy program is activated liquidity will first be accumulated then grabbed (Closing of short orders) this triggers a sweep to the upside. we take advantage of the Dealing range.

*In A Dealing range we focus on our PoI (Points of Interest)
which then a reaction from them triggers a Trade, on our side
See Chart:
